MY IT CAREER DEVELOPMENT PLAN

Target position: Entry-Level IT Support Technician / Help Desk Support **Target field:** IT Support and Networking **Educational profile used in portfolio:** BSIT Graduate, Datamex College of Saint Adeline (verify completed degree status before actual job applications).

Current demonstrated skills

Basic desktop troubleshooting (five documented cases); Excel formulas, pivot tables, charts and data interpretation; GitHub repository management and public Render deployment; basic Python/FastAPI, SQLite and frontend concepts from Golden Crust. Professional communication and customer-facing teamwork experience from service work.

Skills to improve

Independent programming and debugging; network troubleshooting using TCP/IP, DHCP and DNS; router/switch fundamentals; Windows administration, backups, documentation and security hygiene; clearer technical explanation under interview pressure.

Technologies to learn next

Windows system tools and event logs; basic Linux command line; Wireshark (on networks with permission); foundational PowerShell scripting; Git branching and pull requests; SQL query optimization; monitoring and safe cloud deployment practices.

Certifications to consider

Entry-level IT support fundamentals, CompTIA A+ or an equivalent; entry-level networking such as Cisco CCST Networking or CompTIA Network+ after checking requirements, costs and availability. These are goals, **not certifications already earned**.

Six-month goal

Finalize a verifiable project portfolio and résumé; demonstrate five troubleshooting cases; practice common help desk tasks and technical interviews; create one additional documented network-lab exercise.

One-year goal

Apply for entry-level IT support or internship positions, maintain a troubleshooting knowledge base, and complete structured networking study or an introductory certification if feasible.

Three-year professional goal

Develop into a dependable IT Support / Network Support specialist capable of handling more complex infrastructure issues, documenting root causes, communicating clearly with users and mentoring newer staff.

Evidence-based professional statement

I am building toward an IT support and networking career. My portfolio shows what I have worked on—Golden Crust, equipment data analysis, a shared Plano project link, deployment evidence and documented troubleshooting—and what I am still actively learning.
