PROFESSIONAL SUMMARY

Entry-level IT candidate interested in technical support and networking. Experience documenting computer troubleshooting, preparing equipment-inventory analysis in Excel, and testing a working bakery ordering and inventory application. Comfortable learning new tools, explaining technical problems clearly, and collaborating on group projects.

TECHNICAL SKILLS

Support: Basic Windows troubleshooting, connectivity checks, hardware and peripheral diagnostics
Data: Excel formulas, data cleaning, pivot tables, charts, data interpretation
Web & database: Python/FastAPI fundamentals, HTML, CSS, JavaScript, SQLite
Tools: Git, GitHub, VS Code, Render deployment; learning TCP/IP, DNS and DHCP

SELECTED PROJECTS

Golden Crust — Bakery Inventory & Ordering — Working group web application with customer pickup orders, admin inventory management and reporting; tested locally and deployed as an online demo. github.com/Frostner/BreadStore-Inventory-System

School IT Equipment Inventory Analysis — Excel Case Study 8 workbook covering cleaning, calculations, pivot tables, charts and interpretation of inventory records.

Plano — Study Planner — Shared group project; repository credited to piauxdesign. github.com/piauxdesign/plano-study-planner

PRACTICAL EXPERIENCE

Food service and cashier training — Experience working in team-based, customer-facing environments; practiced communication, following procedures and completing time-sensitive tasks.

EDUCATION

Bachelor of Science in Information Technology (BSIT)
Datamex College of Saint Adeline
